

Project Name: Detroit Opera House

Location: Detroit, MI

WetSuit Applicator: Schreiber Corp

Year Completed: 2007

Square Footage: 10,000

An epdm blow off at the Detroit Opera House left the stage vulnerable to bad acting weather. Scheiber Corp. Roofing and Sheet Metal installed the WetSuit® Membrane over 100 mils thick over USG's gypsum facer less recover board, Securock®. Work was completed on time, and the historic building protected once again from the elements.
